ABOUT US

AS EXPERTS IN BUILDING BOATS, WE HELP YOU REACH YOUR POTENTIAL IN KAYAK-CANOE SPORT.

A HODY boat is a reliable companion on your way to reaching your goal; it will spur you to become persistent, to fight and to improve your performance. As **KNUT HOLMANN,** the two-time Olympic Champion said, after he had won in his Orca boat at the **2000 OLYMPIC GAMES IN SYDNEY: „I WON THE 1000 METERS, AND MY BOAT WON THE 500 METERS FOR ME"** We had been making racing kayaks since 1986, our passion for building boats started generations ago.

Our **INNOVATIONS** are unique among the Hungarian boat builder community, we created several special boat types and categories during the past decades: **THE ORCA RACING KAYAK BRAND** that became world-famous after the Sydney Olympics. **THE MINI MK-4 KAYAK FOR YOUTH PADDLERS,** which is recommended by the ICF coach manual and is popular worldwide. **THE K1 MYTHOS,** that pays tribute to the 75-year old Hungarian Canoe Federation. **THE MINI MC-4 CANOE AND MINI MC-2 CANOE. THE ESKIMO KAYAK** that has been designed for kids under the age of 10. **MK-4 DOLPHIN MINI KAYAK** we were the pioneers who made it for the first time.

We recognized that the standard K-4 adult kayak could not be used for training and developing the youth, hence **WE TAILOR-MADE OUR 4-SEAT BOATS TO THE CHILDREN.** The result is such a boat that helps the young kayak athletes to bring out the best in them. The revolutionary new idea has created a new category as well. The MK-4 mini kayak is a unique boat which was developed and **PRODUCED BY HODY ONLY.**

Our sports equipment is produced in line with the highest professional Hungarian (MKKSZ) and International (ICF) standards. **WE ARE OFFICIAL ICF (INTERNATIONAL CANOE FEDERATION) PARTNERS SINCE 2019.**

Our boats contribute to the popularity of the sport worldwide. We delivered boats to **ENGLAND, AUSTRIA, BELGIUM, CROATIA, DENMARK, NORWAY, FRANCE, GERMANY, SLOVENIA, SWEDEN, TURKEY, AUSTRALIA, USA, JAPAN, MALAYSIA, CANADA, SOUTH KOREA, ITALY, SLOVAKIA, SERBIA,** etc...

CERTIFICATION

To whom it may concern:

The International Canoe Federation (ICF) recognises the Art-Montage Ltd equipments are of a high quality and that Art-Montage Ltd is an official partner of the ICF.

The ICF certifies that Hody Boats meet the professional and technical requirements of ICF and are used at ICF competitions and praised by top athletics.

Sincerely yours,

Lausanne, November 2020

ICF Secretary General

K-1 ORCA4

RACING KAYAK

NEW

HIGHER GRADE...

K1 Orca4 is the improved version of our company's own developed Orca, which in its design reflects the characteristics of the boat shapes created before it, so in terms of the boat's speed, it can be said to be a high-speed, but still stable boat. We stayed with the classic shape of the bow of the boat, which is no longer as pronounced as its predecessor. We left the edge at the bow of the boat, and the part behind the seat was slightly widened. With the changes, it was possible to increase the top speed and stability of the boat.

	M	ML	L	XL
Length (cm)	520	520	520	520
Width (cm)	39	38,5	38,5	000000
Cockpit Length (cm)	91	94	96	000000
Cockpit Width (cm)	42,9	42,5	43,2	000000
Weight (kg)	8-12	8-12	8-12	8-12
Paddler's weight (kg)	55-70	70-80	80-90	90-105
Stability (1-5)	3	3	3	3

PLUS

Materials and technology used

Bottom of the boat: carbon / carbon sandwich structure, deck's fiberglass sandwich structure: vinyl ester resin / manual lamination.

Recommendation

The PLUS design is mainly recommended for junior athletes. But it is also a great choice, if you need a high quality mini or touring boat for the best price

PLUS+

Materials and technology used

Bottom of the boat: carbon / carbon sandwich structure with vacuum technology, deck's carbon structure: vinyl ester resin / manual lamination.

Recommendation

The PLUS+ design is mainly recommended for junior athletes.

EXTRA

Materials and technology used

Carbon sandwich structure / vinyl ester resin / vacuum injection. In case of the EXTRA design, you can go for the see-through gel layer for a carbon style boat.

Recommendation

The EXTRA HODY model is popular among those racers and private people who are looking for a professional racing boat.

PREMIUM

Materials and technology used

Carbon / honeycomb / vinyl ester resin / vacuum technology.

Recommendation

Are you ready to win? The PREMIUM design is the best possible choice for racers, due to its layers of carbon and honeycomb that guarantee extraordinary rigidity.

MARATHON

Materials and technology used

Unique carbon material / sandwich material / vinyl ester resin / vacuum technology.

Recommendation

Do you need the perfect boat for marathons and long-distance races? Due to its special material used, the MARATHON design is such a light-weight construction which remains rigid and durable at the same time.

K-1 ORCA

RACING KAYAK

I WON THE 1000 METERS, AND MY BOAT WON THE 500 METERS FOR ME

Knut Holmann, the two-time Olympic Champion said, after he had won in his ORCA boat at the 2000 Olympic Games in Sydney

BORN TO WIN!

This kayak is the reinterpretation of the world-famous Orca racing boat, sold in different sizes, which led Knut Holmann to victory at the Olympic Games in Sidney. The square deck design gives an unbelievable solidity to the hull (it comes very handy both at paddling and when transporting the boat), the straight bottom design and sharp bow is ideal in waves, the „breaks" in front of the cockpit guarantee efficient movement in water. It is an optimal choice for 500-1000 meters and marathons. The youngest member of the K1 Orca family is perfect for lightweight racers and was deliberately designed as an ideal racing boat for juniors.It is sold in Basic, Plus, Extra, Premium and Marathon design, just pick your own!

K-1 MYTHOS

RACING KAYAK

CELEBRATING TRADITIONS

Celebrating the 75th anniversary of the Hungarian Canoe Federation, we created MYTHOS in 2016, which combines 30 years of boat building experience and modern technology. The further developed Orca kayak, has got a slightly banana hull, which helps the boat rise at the start. We pay tribute to HODY's 75 years in boat building. Here, you will find the boat that matches your style and paddling technique the best! It is sold in Basic, Plus, Extra, Premium and Marathon design, just pick your own!

K-2 ORCA

RACING KAYAK

DESIGNED FOR THE YOUNG

Similar to the other members of the ORCA family, the K2 ORCA racing boat was inspired by the world-famous Sydney Olympics winner K1 ORCA. The K2 ORCA kayak was built using the experience of the development of the K1 ORCA family, which was reborn in 2011. The even more solid hull guarantees an ideal running in waves and features a more effective way of moving in water. Here, you will find the boat that matches your style and paddling technique the best! It is sold in Plus, Extra, Premium and Marathon design, just pick your own!

	ML	L
Length (cm)	650	650
Width (cm)	40	41

ESKIMO

MINI KAYAK

ESKIMO – FOR EVEN THE SMALLEST RACERS

Hodysport built the new eskimo kayak in 2019, reviving and updating the old boat type. Rudolf Dombi Olympic Champion also congratulated us on our new boat and was happily reminiscing about the time when he started kayaking. He supported our plan that Hody eskimo kayak would provide opportunity for the very young to get to love kayaking and at the same time would expand the kayak-canoe pool of young racers. It is sold in Basic and Plus design, just pick your own!

	ESKIMO
Length (cm)	300
Width (cm)	50
Cockpit Length (cm)	66
Cockpit Width (cm)	37
Weight (kg)	9

MK-4 DOLPHIN

MINI KAYAK

WE WERE THE PIONEERS WHO MADE IT FOR THE FIRST TIME

MK4 DOLPHIN – FOR FUTURE CHAMPIONS!
As a world innovation among kayaks, HODY MK4 mini kayak is an essential tool for learning how to paddle in team and for kids to get to know and love kayaking. The case of training young athletes is very close to our heart, particularly when it comes to the Hungarian kayak-canoe champions-to-be. This commitment led to the idea of a completely new type of boat, the MK-4 mini kayak, which had won over the whole kayak community.

The MK-4 mini kayak is a unique boat which was developed and produced by HODY only. The revolutionary new idea created a new category as well. We recognized that the standard K-4 adult kayak could not be used for training and developing the youth, hence we tailor-made our 4-person boat to the children. The result is such a boat that helps the young kayak athletes to bring out the best in them.

Children warmed to the boats immediately, since paddling in a mini kayak with 4 is a great life experience. As a coach of young kids, you will find the use of this kayak priceless when you teach team paddling, different techniques and team building. The mini boats are certified by the boat certification committee of the Hungarian Canoe Federation and meet all racing standards. On top of the MK4 we also sell MK1 and MK2 mini kayaks. Here, you will find the boat that matches your style and paddling technique the best! It is sold in Plus, Extra and Premium design, just pick your own!

	MK4 DOLPHIN
Length (cm)	850

MC-1
MINI CANOE

FOR YOUNG CANOEISTS

Our mini boats are recommended for those who would like to try kayaking or canoeing. The size and design are perfect for kids. The HODY mini canoes were produced to meet the professional standards of training kids. We sell our mini canoes in two and four-person versions. Our MC boats meet the official and strict requirements of MKKSZ. Here, you will find the boat that matches your style and paddling technique the best! It is sold in Basic, Plus and Extra design, just pick your own!

	MC1 MINI CANOE
Length (cm)	465
Width (cm)	52
Cockpit Length (cm)	-
Cockpit Width (cm)	-
Weight (kg)	12
Paddler's weight (kg)	35-60
Stability (1-5)	4

BASIC

Materials and technology used

Fiberglass / sphere core sandwich structure / polyester resin / manual lamination.

Recommendation

The BASIC design is the reliable basic option, if you are looking for quality mini or racing boats for your club with a good price-quality ratio.

PLUS

Materials and technology used

Bottom of the boat: carbon / carbon sandwich structure, deck's fiberglass sandwich structure: vinyl ester resin / manual lamination.

Recommendation

The PLUS design is mainly recommended for junior athletes. But it is also a great choice, if you need a high quality mini or touring boat for the best price.

PLUS+

Materials and technology used

Bottom of the boat: carbon / carbon sandwich structure with vacuum technology, deck's carbon structure: vinyl ester resin / manual lamination.

Recommendation

The PLUS+ design is mainly recommended for junior athletes.

EXTRA

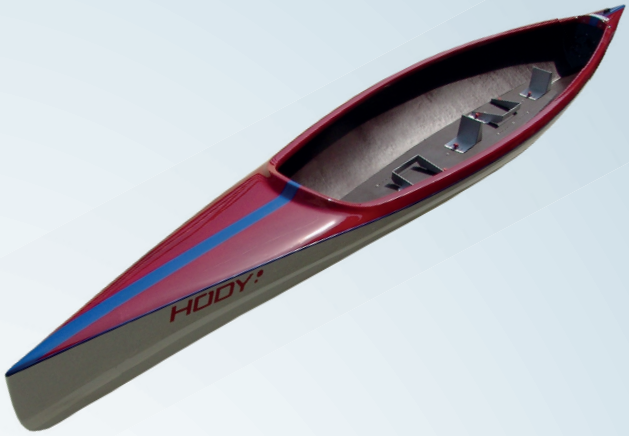

Materials and technology used

Carbon sandwich structure / vinyl ester resin / vacuum injection. In case of the EXTRA design, you can go for the see-through gel layer for a carbon style boat.

Recommendation

The EXTRA HODY model is popular among those racers and private people who are looking for a professional racing boat.

MC-2
MINI CANOE

TWO-PERSON MINI CANOE FOR CHAMPIONS

The success of M-4 inspired us to build two and four-person canoes for the young as well, that would meet all the requirements of kids. We created the two and four-person Hódy mini canoes with the support of the Hungarian Canoe Federation and in line with their professional criteria. (MC-4, MC-2) Our MC boats meet the official and strict requirements of MKKSZ. Here, you will find the boat that matches your style and paddling technique the best! It is sold in Plus and Extra design, just pick your own!

	MC2 MINI CANOE
Length (cm)	520
Width (cm)	75
Cockpit Length (cm)	-
Cockpit Width (cm)	-
Weight (kg)	20
Paddler's weight (kg)	80-120
Stability (1-5)	5

PLUS

Materials and technology used

Bottom of the boat: carbon / carbon sandwich structure, deck's fiberglass sandwich structure: vinyl ester resin / manual lamination / vacuum technology.

Recommendation

The PLUS design is mainly recommended for junior athletes. But it is also a great choice, if you need a high quality mini or touring boat for the best price.

EXTRA

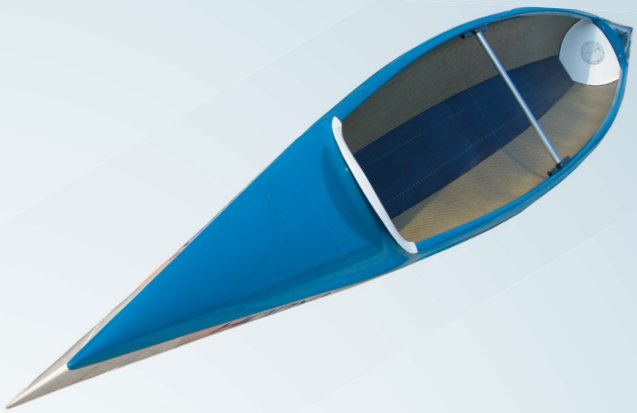

Materials and technology used

Carbon sandwich structure / vinyl ester resin / vacuum injection. In case of the EXTRA design, you can go for the see-through gel layer for a carbon style boat.

Recommendation

The EXTRA HODY model is popular among those racers and private people who are looking for a professional racing boat.

MC-4
MINI CANOE

MINI CANOE FOR TEAMS OF FOUR

We turned over a new leaf in the history of kayak-canoe sport and felt bound to build our (two) and four-person mini canoe. Our MC boat meets the official and strict requirements of MKKSZ. Here, you will find the boat that matches your style and paddling technique the best! It is sold in Plus and Extra design, just pick your own!

	MC4 MINI CANOE
Length (cm)	650
Width (cm)	75
Cockpit Length (cm)	-
Cockpit Width (cm)	-
Weight (kg)	40
Paddler's weight (kg)	160-240
Stability (1-5)	5

PLUS

Materials and technology used

Bottom of the boat: carbon / carbon sandwich structure, deck's fiberglass sandwich structure: vinyl ester resin / manual lamination / vacuum technology.

Recommendation

The PLUS design is mainly recommended for junior athletes. But it is also a great choice, if you need a high quality mini or touring boat for the best price.

EXTRA

Materials and technology used

Carbon sandwich structure / vinyl ester resin / vacuum injection. In case of the EXTRA design, you can go for the see-through gel layer for a carbon style boat.

Recommendation

The EXTRA HODY model is popular among those racers and private people who are looking for a professional racing boat.

TK-1 MARLIN

TOURING KAYAK

TOURING KAYAK WITH THE SPEED OF A RACING BOAT

Marlin is one of the nimblest sea fish. It is no wonder why we named our boat Marlin. We implemented our experience in creating racing boats and produced a boat that was considered really fast among other touring vessels. As an extra for your boat, you can also order storage compartments to enjoy a better feeling of comfort. Do you spend most of your life in your kayak? Or are you a first time touring kayaker? Here, you will find the boat that matches your style and paddling technique the best! It is sold in Basic, Plus, Extra, Premium and Marathon design, just pick your own!

	TK-1 MARLIN
Length (cm)	520
Width (cm)	53
Cockpit Length (cm)	100
Cockpit Width (cm)	41,5
Weight (kg)	12-16
Paddler's weight (kg)	60-100
Stability (1-5)	4

BASIC

Materials and technology used

Fiberglass / sphere core sandwich structure / polyester resin / manual lamination.

Recommendation

The BASIC design is the reliable basic option, if you are looking for quality mini or racing boats for your club with a good price-quality ratio.

PLUS

Materials and technology used

Bottom of the boat: carbon / carbon sandwich structure, deck's fiberglass sandwich structure: vinyl ester resin / manual lamination.

Recommendation

The PLUS design is mainly recommended for junior athletes. But it is also a great choice, if you need a high quality mini or touring boat for the best price.

PLUS+

Materials and technology used

Bottom of the boat: carbon / carbon sandwich structure with vacuum technology, deck's carbon structure: vinyl ester resin / manual lamination.

Recommendation

The PLUS+ design is mainly recommended for junior athletes.

EXTRA

Materials and technology used

Carbon sandwich structure / vinyl ester resin / vacuum injection. In case of the EXTRA design, you can go for the see-through gel layer for a carbon style boat.

Recommendation

The EXTRA HODY model is popular among those racers and private people who are looking for a professional racing boat.

PREMIUM

Materials and technology used

Carbon / honeycomb / vinyl ester resin / vacuum technology.

Recommendation

Are you ready to win? The PREMIUM design is the best possible choice for racers, due to its layers of carbon and honeycomb that guarantee extraordinary rigidity.

MARATHON

Materials and technology used

Unique carbon material / sandwich material / vinyl ester resin / vacuum technology.

Recommendation

Do you need the perfect boat for marathons and long-distance races? Due to its special material used, the MARATHON design is such a light-weight construction which remains rigid and durable at the same time.

HODY® just add water

TK-2 MARLIN

TOURING KAYAK

A TANDEM TOURING KAYAK WITH THE NIMBLENESS OF A RACING BOAT

The TK2 touring kayak was named after one of the fastest sea fish, called marlin. The boat is unusually fast in its category thanks to the experience we collected with our HODY racing boats, to the latest technology used and to the traditions of HODY. As an extra for your boat, you can also order storage compartments to enjoy a better feeling of comfort. Are you experienced in kayak touring? Or are you a first time touring kayaker? Here, you will find the boat that matches your style and paddling technique the best! It is sold in Basic, Plus, Extra, Premium and Marathon design, just pick your own!

	TK-1 MARLIN
Length (cm)	650
Width (cm)	53
Cockpit Length (cm)	100 / 99
Cockpit Width (cm)	40 / 43,5
Weight (kg)	16-22
Paddler's weight (kg)	110-190
Stability (1-5)	4

THEY SAID ABOUT US

I would like to share my thoughts on the activity of Hody Team. The success of Hungarian Kayak and Canoe has always been built on the strong basis of extraordinary expertise of Hungarian boat and paddler producers. The Hódy Plant is still building its activity on the expertise of a traditional boat builder, namely Jüling Rudolf (the father of Hódy Ágnes). Boat builders always played an important role in our successes in the past as Hody does today for this generation. Hody boats represent outstanding service and quality whilst their price is affordable. One of their unique innovation is the MK-4 that no one could manufacture before. As for the quality, it is enough to mention that Knut Holmann won two gold medals in Hody boat at the Sydney Olympic Games. Thousands of young and adult, amateur and professional kayakers and canoers use Hody boats for their training, during racing and for fun as well.

I wish the best for Hódy Family and hope that they continue to provide this outstanding performance on a national and on international level as well. Their role in the Hungarian Kayak-Canoe is undisputable.

Tamás Wichmann
Nine-time canoe World Champion, three-time European Champion, two-time Olympic runner-up, one-time Olympic bronze medalist, thirty-seven-time Hungarian champion.

Shortly after I started coaching in Canada in 1987, I recognized the needs of good quality boats by the local canoe clubs. Therefore I started exporting boats from Hungary in 1991, and I am the Canadian Dealer for Hodysport in the last twenty years. Reflecting back to this time, it seems to me that my relationship with the Hody family was always more a friend kind than a businesslike type. The Hody boats are made on world class level, both the successful high-level racing "Orka" family and the popular Mini boat series. These latest boats are designed to serve the clubs grassroots level teaching and athlete development functions. The high quality and carefully designed boats are aesthetic looking, and the prices are more affordable than many of the other companies. This is proof for me that for the Hodys, not the high profit is the main and most important driving force, but the love of the canoe sport and to serve its development and future. I have a similar motivation in this aspect, and perhaps this common attitude is the reason for our long-term good cooperation.

Tamás Buday
Hody dealer
Olympic medalist and 4x World Champion

My young coachees have been using racing kayaks, made in Kálmán Hódy's workshop, successfully on Lake Velence for two decades now. The K1 Orca, K1 Mythos, K2 Orca boats have won several races at Hungarian Championships and at the Olympic Hopes Regatta. The boats run perfectly and move efficiently on water.
The MK4 four-person kayak has revolutionized the development of Hungarian racing boat production for the young athletes. The unique mini size of the boat makes practising teamwork easier. I am incredibly happy that the old favourite, the eskimo boat for kids, has been revived, using modern technology. The MK1 Dolphin, that is perfect for learning the basics, features great quality, sturdiness and long lifespan which makes it very practical for us. I've also bought Hódy MK1 Dolphin myself for my kids.

Ildikó Major
Kayak-canoe coach
Lake Velence Water Sport School

I use HODY kayaks for my athletes since 1997. The boats are absolutely reliable, durable and very well constructed. With these boats we won many Greek National gold and other medals and also my athletes were selected for the Greek National sprint Canoeing Team. Our latest achievement is that we took the title of the Champion Canoeing Club during the Greek National Sprint Canoeing Championship for 2019. Thank you HODY KAYAKS for helping us being the best!

Athanasios D. Villiotis
Canoeing Coach of Nautical Club "Saint Nicolas" of Gyala-Salamis GREECE,
Champion Canoeing Club of GREECE during the Greek National Sprint Canoeing Championship for 2019.

I first went to kayak when I was 9 years old. Besides the first few months of learning how to paddle, I have been using HODY boats. I started in a HODY owned by a club but I soon managed to convince my parents to buy me my very own HODY kayak. I can't even imagine myself in any other boat. Since then, I have been lucky enough to get closer to the Hódy Family as well. They helped a lot during my training period not only by making all my wishes come true when it came to the boat but by being my friends all over the training weeks. With its stability and continuous presence in my life, Hódy has become a part of my family.

Anna Máró
European Championship – silver medalist, junior women K1 500 m. , 8 times Hungarian Champion
Olympic Hopes Regatta in 2020 youth age group: k1 500 AND 100 METER gold medalist,
K4 500 meter gold medalist. K1 200 m silver madalist
Youth Hungarian Champion in 2020 K1 1000 and 200 meter gold medalist, K1 500 meter silver medalist

ACKNOWLEDGE

Dear Sir/Madam,

On behalf of the International Canoe Federation (ICF) undersigned hereby I would like to extent our acknowledge to

Mr. and Mrs. Kalman Hody

for the excellent works what they have been doing for canoeing sport since many decades.

I am convinced that the planned and constructed boats with innovation played an important factor for the World wide successful Hungarian Canoe / Kayak!

Boats produced by Hody Sport are well known in the canoeing family in Europe and other continents. Many successful young athletes reached medals in paddling “Hody boats”.
The introduced so called “mini kayak four” boats for youth the only one in this type in the world was planned and construed by Mr. / Mrs. Kalman Hody!

I would like to use this opportunity for expressing my personal and the ICF hearty appreciation for Hody family’ dedication for kayaks and canoes construction for Hungarian and to other athletes around the World.

Yours Sincerely,

ICF Technical Expert

KAJAK KENU SPORT

Budapest, 21 October 2015

AKNOWLEDGEMENT

On behalf of the Hungarian Canoe Federation I would like to extend our acknowledgement to

Mr. and Mrs. Kálmán Hódy

and

Hódy Sport

for the excellent work, that they have been doing for the kayak/canoe sport for decades by the boats that they designed and built, and which are so popular in the canoeing family around the World.

The "MK-4" boat, introduced by the Hódy family, is the only one in the World of its kind used by children in Europe and other continents. This boat is planned and construed by the Hódy Sport.

I would like to express our personal and the Hungarian Canoe Federation's appreciation for Hódy family's commitment to the Hungarian and foreign athletes in the kayak/canoe sport.

Gábor Schmidt
